## A Non-secular Anthropocene

### Spirits, Specters and Other Nonhumans in a Time of Environmental Change

#### Conference

Koncertkirken, Copenhagen  
8-10 June 2017

What kinds of spirit ecologies haunt the naturecultures of the Anthropocene? This conference explores the magical ecologies of nonhumans to stake out a study of a non-secular Anthropocene: an approach to environmental crisis that begins with the eco-theologies of co-species life to ask questions about the links between political ecology and political theology.

Organized by AURA (Aarhus University Research on the Anthropocene), a research project devoted to the cross-disciplinary and multispecies study of the arts of living on a damaged planet.

Free admission. All are welcome.
